

EVERNOTE-BASED TASKS

Creating sign language dictionary

TARGET GROUP	Sign language teachers and learners
CONTEXT (Ex: in class, online etc.)	Blended or virtual learning environment
LEARNING OUTCOMES	Expanding sign language vocabulary
TOOLS AND RESOURCES	Evernote , camera
CONTENT	<p>Learning sign language is an ongoing process. When you come across a new sign, just take a picture of your hands with Evernote and annotate the image using arrows to show the way that your hands are supposed to move.</p> <p>Examples: Image 1 Image 2</p> <p>Evernote allows you also to organize your sign language vocabulary into separate notebooks and notebook stacks.</p>

ASSESSMENT

EVALUATION OF STUDENTS' WORK

TEACHER SELF-EVALUATION OF THE ACTIVITY

ADDED VALUE

(Increase in value created by the use of the ICT tool)

Sign language teachers can easily capture sign language by taking a photograph and adding a small arrow for indicating the motion of hands, a process would otherwise require sketching or drawing hand movements.

POTENTIAL CHALLENGES
